Milestone2_Controller	Tesing Plan	Suppose				
Class Name	Unit Test Name	Fail?	Classes and Methods	Input	Exepectation	Output Example (notes):
Controller:				input : Readbale,		
WorldController_Console			WorldControllor Concolo Immiore out/	worldModel : World,	Success Create a	
_Implement	testControllerConsoleCreateSuccess		WorldController_Console_Implement()	output : Appendable	WorldController_Console Game Console successfully	
	testControllerConsoleStartGameSuccess		startGame()		started	See welcome info to the game program
			starteae()		Game Console successfully quit	dee welcome mile to the game program
	testControllerConsoleQuitGameSuccess		quitGame()		the program	Quit back to root directory
					Game setup correctly and start	
	testControllerConsoleStartPlaySuccess		startPlay()		the rounds/turns to play	Display one room info.
						Room number, name, items, players,
	testControllerConsoleGetOneRoomInfo		getOneRoomInfo(String)	String-room name	String of the info of the room	target in the room, neighbors
	to at Country all and Connection Cot Plans and Info		mat Dia va va la fa / )		Give the list of the players and	mlayer 1 mlayer 2 mlayer 2 to calcat
	testControllerConsoleGetPlayersInfo		getPlayersInfo()		make selection from this list	player 1, player 2, player 3 to select.
					A png file of the world Map corrected. Return True success	
	testControllerConsoleCreateMapPngSuccess		createGraphBufferedImage()		created.	WorldMap.png generated
				String of the player		
	testControllerAddOnePlayerSuccess		addOnePlayer()	name & initial room	A player added successfully	
				String of the moving	Human player can move	
	testControllerConsoleCmdMovePlayer		cmdMove()	target room	successfully	
	testControllerConsoleCmdPickPlayer		cmdPick()		Human player can pick item successfully	
	testcontrollerconsolectifurickriayer		churick()		Human player can look around	
					and disply lookaround info	
	testControllerConsoleCmdLookAroundPlayer		cmdLookArround()		mation	String representation of the roomInfo
	testControllerConsoleCmdKillPlayer		cmdKill()		Human player can hurt dr lucky	
				String of the moving	Computer player can move	
	testControllerConsoleCmdMoveComputer		cmdMove()	target room	successfully	
	testControllerConsoleCmdPickComputer		cmdPick()		Computer player can pick item successfully	
	testcontrollerconsolectifur texcompater		charick()		Computer player can look around	
					and disply lookaround info	
	testControllerConsoleCmdLookAroundComputer		cmdLookArround()		mation	String representation of the roomInfo
	testControllerConsoleCmdKillComputer		cmdKill()		Computer player can hurt dr lucky	1
MarildComerce and	totalMayldCoadWillDadwaallyTa7ayaCwaaaa		and distil/) Resussints/)		Completely killed DrLukcy &	Disalou mousik () winner infe
WorldCommand	tetsWorldCmdKillReduceHpToZeroSuccess		cmdKill() & execute()		game over	Display reuslt & winner info
	tetsWorldCmdKillReduceHpSuccess		cmdKill() & execute()		Kill success, DrLucky's hp decreased	Display result info
			,		try to execute the Kill command,	, ,
					but failed due to game rule kill	
	tetsWorldCmdKillFailed	Failed	cmdKill() & execute()		condition not meet	Display kill failed info
	tostWorldCmdCotOnoDloverInfoCococo		amdCatOnaBlavariafa()	String of the player	String of the player info, items,	"Player1 has items:, currently in roon
	testWorldCmdGetOnePlayerInfoSuccess		cmdGetOnePlayerInfo() & execute()	name String of the player	current Room info	#"
				String of the player name that doesn't	Error info displayed by the	"The player name you entered does not
	testWorldCmdGetOnePlayerInfoFailed	Failed	cmdGetOnePlayerInfo() & execute()	exist in the game	console	exist in this game round"
				String of the room	Success moved to the targeted	
	testWorldCmdMoveSuccess		cmdMove() & execute()	name moves to	room	
			h4 () 0	String of an Invalid	Error info displayed by the	"The room name is invalid or not existi in
	testWorldCmdMoveFailed	Failed	cmdMove() & execute()	room name	console	the game"
	testWorldCmdAddOneHumanPlayerSuccess		addOnePlayer() & execute()	String of a duplicated player name	A player added successfully	"Player 1 added successfully"
	testav ortaemanauonemaniria yersuttess		addonct tayer() & execute()	piayer name	A player added successfully	Trayer I added successfully

	test World Cmd Add One Human Player Duplicated Name Failed	Failed	addOnePlayer() & execute()	String of a duplicated player name String of a player	Error info displayed by the console	"The player name already exist in the game, try a different name"
	testWorldCmdAddOneHumanPlayerWrongInitialRoomFailed	Failed	addOnePlayer() & execute()	name with invalid initial room info	Error info displayed by the console	"The player can not be placed in that room due to room number in correct"
	testWorldCmdPickSuccess	raileu	•	ilitiai 100iii iiii0	Picked item success	Toom due to room number in correct
	testworiacmaricksuccess		cmdPick() & execute()			
	testWorldCmdPickDuplicatedFailed	Failed			Error info displayed by the console	"Duplicated item detected"
	·					String representation of the lookaround
	testWorldCmdLookAroundSuccess		cmdLookAround() & execute()		Display the lookaround info A png file of the world Map corrected. Return True success	roomInfo
	testWorldCmdCreateMapPngSuccess		createGraphBufferedImage() & execute()		created.	WorldMap.png generated
Model: Player_Implement	testPlayerHumanCreatedSuccess		Player_Implement()	name : String, room : int, checkComputer : boolean	A human player created successfully	
	,			name : String, room :		
				int, checkComputer :	A computer player created	
	testPlayerComputerCreatedSuccess		Player_Implement()	boolean	successfully	Computer player flaged for this player
	testPlayerCreateNullNameFailed	Failed	Player_Implement()	Player name is Null	IllegalArgumentException	
				name : String, room :		
	testPlayerWithInvalidItemLimitFailed	Failed	Player_Implement()	int, checkComputer : boolean	IllegalArgumentException	Player limit is negative, failed
	testPlayerCheckPlayerHumanSuccess	i alieu	checkComputerPlayer()	boolean	False for human player	FALSE
	testPlayerCheckPlayerComputerSuccess		checkComputerPlayer()		True for computer player	TRUE
